

The background of the entire page is a close-up photograph of several aluminum beverage cans. The cans are covered in water droplets, suggesting they are cold. The lighting is dramatic, with a dark blue background and highlights on the metallic surfaces and the condensation. The cans are arranged in a way that creates a sense of depth and repetition.

A Global Food and  
Beverage Leader Saves  
\$17+ Million Annually by

# Transforming Supply Chain with Advanced Analytics

# A Summary

---

**Optimizing operations  
while advancing  
sustainability efforts.**

A global food and beverage leader sought to transform its supply chain with a comprehensive data foundation to drive operational visibility and intelligence.

The goal was to optimize warehousing, distribution, and demand forecasting, and ensure quality assurance while advancing sustainability efforts across their operations.

# The Background

Our client, a global leader in the food and beverage industry, partnered with Tiger Analytics to transform their supply chain for greater efficiency, service excellence, and enhanced sustainability.

Using advanced analytics, we built a robust data foundation to enable end-to-end visibility and decision intelligence across key areas such as intelligent warehousing, dynamic route optimization, and customer service.

**The client could make data-driven, resilient, and sustainable supply chain decisions by leveraging solutions such as demand forecasting, crop growth monitoring, and quality assurance using computer vision.**

# Our Solution

## ➤ **Unified Data Model and Frameworks:**

Built a reusable data model to integrate data from multiple sources, in addition to automated DevOps processes and a self-service portal for streamlined data management and governance.

## ➤ **Warehouse Management Intelligence:**

Developed a near real-time Intelligent Warehouse Management System (IWMS) dashboard, enabling advanced KPI reporting and visualization for efficient warehouse operations across multiple sites.

## ➤ **Order Visibility and Risk Prediction:**

Established end-to-end visibility for order status, enabling predictive risk identification and providing data-driven recommendations to mitigate delays and optimize delivery.

## ➤ **Optimized Distribution Center Selection:**

Created a model to determine the optimal distribution center for sales zones, factoring in historical data, cost, and capacity, along with scenario planning for different constraints.

## ➤ **Automated Planogram Compliance:**

Built a machine-learning solution and mobile app for real-time planogram compliance auditing, enhancing shelf visibility and product availability.

## ➤ **Crop Monitoring and Yield Prediction:**

Leveraged satellite imagery and machine learning to assess crop quality and predict growth stages with a dashboard for tracking key metrics and crop development.

## ➤ **Computer Vision for Quality Assurance:**

Developed a real-time, computer vision-based solution to optimize potato peeling inspections, improving accuracy and adjusting parameters automatically.

## ➤ **Sustainability Impact Analysis:**

Provided sustainability metrics for manufacturing operations, delivering cost-impact analysis and dashboards to track plant performance and the financial impact of sustainability efforts.

# Value Delivered

**Cost Optimization in Distribution:** Optimized distribution center selection through scenario planning and cost impact simulations, leading to an estimated 4% reduction in shipping costs.

**Operational Efficiency and Cost Savings:** Enabled unified tracking and real-time visibility across supply chain KPIs, enhancing decision-making speed and operational efficiency, resulting in annual cost savings of approximately \$17 Million.

**Enhanced Inventory Management and Sales Uplift:** Developed a streamlined ordering process that minimized overstocking and unsaleables, enhancing product availability and driving higher sales.

**Risk Mitigation and Customer Satisfaction:** Delivered predictive risk insights for potential shipment delays, allowing for proactive issue resolution which reduced penalties and overall delivery times, improving customer satisfaction.

**Automation in Compliance and Quality Assurance:** Automated planogram compliance audits and potato peeling inspections, reducing time and manual effort by over 75% and significantly minimizing errors, improving speed and accuracy across global operations.

# We provide certainty to shape a better tomorrow

Tiger Analytics is a global leader in AI and analytics, helping Fortune 1000 companies solve their toughest challenges. We offer full-stack AI and analytics services & solutions to help businesses achieve real outcomes and value at scale. We are on a mission to push the boundaries of what AI and analytics can do to help enterprises navigate uncertainty and move forward decisively.

Being a recipient of multiple industry awards and recognitions, we have **4500+** technologists and consultants, working from multiple cities in 5 continents.
